" He that by the Plow would thrive Hierard must either much or parve."

Farmers' Calendar for July.

When the day-king rears his head Pleasant is the flowery meal, While the sun exhalor the dow. Hark I the mover whete the seythe? fice the grass before him fall ! To the cheltering tweed wall

lo, it was all grown over with weeds;" and of a steamship while sailing to Liverpool then I went on to the field of the industri- or Calcutta. Had God designed the had passed between the roes of the waving corn, and the hands and the hoe had cleared corn, and the hands and the hoe had cleared corn, and the hands and the hoe had cleared corn, and the hands and the hoe had cleared corn, and the hands and the hoe had cleared corn, and the care corn, and the car off the weeds, and the field was clean and beautiful to the eye of the husbandman and the traveller to the eye of the husbandman and the traveller to the eye of the husbandman and the traveller to the eye of the husbandman and the traveller to the eye of the husbandman and the traveller to the eye of the husbandman and the traveller to the eye of the husbandman and the expansive force of heat, he would have given us hands which could take a grantee quarry and break its solid acres into the traveller! What an amazing difference suitable and symmetrical blocks as easiwith the other, all is thrift and order and by which we could carry the vast freights neatness and prosperty. July is the month of railroad cars and steamships, as a porto ply the hoe and swing the scythe. At- ter carries his pack. He would have givtend to the meadow and the corn-field, and see that neither the potatoe patch nor the corn, nor the wheat, nor the oat field is neglected. Attend to hay-making, and see to it that exercise the first that exercise the corn, and Atlantean shoulders, and the lungs of Boreas, he has given us a mind, a soul, it that every thing on the farm that can be a capacity for acquiring knowledge, and converted into fodder is carefully cured thus of appropriating all these energies and saved as a defence against long winters of nature to our own use. Instead of and short crops. Buck and Brindle will telescope and microscopic eyes he has thank you by their looks if not by their given us power to invent the telescope smiles. A man of energy will make the and microscope. Instead of ten theumost of every hour, and secure his hay while the sun shines; one of an opposite character lounges away his time and suffers his hay to be caught in the rain and half-spoiled; or if the latter should have half-spoiled; or if the latter should have tivated intellect he commands them all. the good fortune of the continuance of dry weather his hay will be a week longer in the field than his neighbors, and all its sap it is half cured, is poor economy, and pre- oughly exhausted. vokes the cattle to waste their folder, and weed is not cut in the blow 'tis lost.

High gleaming new the sundeplays. His movelled face, and pours a blaza Of sight and heat on every hand To warm the earth and nerve the hand.

too much cold water. Dear Margaret, an unresisting effigy in a similar posigive us a drink of sweet and wholesome tion; the sudden assault on a wintry day beer, and we'll away again to the field, the then resulted in tumbling his ramship scythe, the rake and the fork. Huzza for into a cold bath, which his improved the Hay-Cart, the Plow and the Hoe, and manners took good care to avoid in futhe Fourth of July !

the 21st to the 24th of September. The the flock were quietly feeding at the prizes to be awarded will reach \$6,000, bottom. The ram being free, and in besides the annual prize of \$125 for the haste to rejoin his friends, tumbled and besides the annual prize of \$125 for the best bushel of wheat, and \$150 for the best horse, 19 hands high well topped, is still to confine himself to cooked mutround in the barrel and deep in the chest, ton hereafter. having weight proportioned to the size Man's reason was given him to conand a good traveler. The Canadians are trol " the beasts of the field and birds determined to improve their breed of if he will bring this into play, he will horses. To do so they must introduce have no difficulty in meeting and overthe Morgan and the Black Hawk.

Horace Mann on Labor.

"It was not the design of Providence that the work of the world should be an's toil and tardiness. The cotton mills insects do not prevail, one half of the of Massachusetts will turn out more cloth above quantity of seed will be sufficient. in one day than have been manufactured As soon as the plants put forth four by all the inhabitants of the Eastern con- leaves, an expanding and contracting tinent during the tenth century. On an steel tooth cultivator should be passed element which in ancient time was sup- through the rows levelling down the posed to be exclusively within the con- drills, and so set that the teeth will work trol of the gods, and where it was deem- close to the plant without destroying any ed impious for human power to intrude, of them. The hand hoe then must be even there the gigantic forces of nature, used to cut out the weeds and partially which human science and skill have en- thin the plants, A shovel plow must listed in their service, confront and overcome the raging of the elements—breasting tempests and tides, escaping reef
